

Michael Campion, M.Ed., has served as Director of Academic and Learning Technologies at the University of Washington School of Medicine since 2008. His department partners with faculty and students in the effective use of technology and data to support medical student education. Examples of this work include instructional design, course and curriculum management, media production and delivery, audio-visual systems, administrative and evaluation systems, and data/dashboard development. He has been actively involved in numerous national committees and work groups at the intersection of education, technology, and medicine. Currently, he is Chair of the Group on Information Resources in the Association of American Medical Colleges (AAMC).

Prior to joining the School of Medicine, Michael was Director of Online Learning for University of Washington Educational Outreach, where he oversaw the design and delivery of online degree and certificate programs as well as stand-alone courses. He earned his Master of Education degree with an emphasis on educational technology from University of Washington and his Bachelor's degree in History from Northwestern University.
